EXECUTIVE SUMMARY

A React.js developer with 4 years of experience in the development and refinement of web development and applications. As part of a team consisting of four engineers and a designer, I have honed my skills in improving accessibility and UX for users.

PROFESSIONAL COMPETENCE.

- **Next.js, React.js and Javascript**
- **Collaboration with Engineers/Designers**
- **Responsive UI (HTML, CSS, Tailwind CSS, Bootstrap)**
- **Expertise with Git and GitHub**
- **Front-end build pipeline tools like Webpack, NPM, Babel, and Vite.**
- **Development and refinement of new and existing user interfaces.**

WORK EXPERIENCE

Axel Cyber LLC.

Dec, 2022 – May, 2025

Axel Cyber Enterprises offers Information Technology Services and contracts and has 7+ employees in the tech department.

Frontend Developer

- **Next.js (react):** Employing the React JavaScript framework for resolving web development issues.
- **Collaboration with Engineers/Designers:** Collaborating closely with a team of engineers and a designer to provide software solutions to 2 projects.
- **Modern Frontend Tools and Build Process:** Optimized the development process of web applications by integrating modern frontend tools such as webpack and NPM; reduced build times by 40% and improved website loading speed by 25%
- **Expertise with Git and Github:** Having a solid understanding and skill set in utilizing Git and GitHub for managing work projects is essential in today's technology-driven world. It helps make code reusability and communication 50% more effective
- Monitoring web analytics to track accessibility metrics such as the number of visitors using accessibility features, and bounce rate of visitors with accessibility needs: For example, 60% bounce rate among users with visual impairments.

Technage Limited.

Jan 2024 - Apr 2024.

Birmingham, England, United Kingdom · Remote

Frontend Developer

- I worked with four developers to develop a Hamper E-commerce system for a UK-based company. We used Laravel framework for the backend, React for the front end, and Postman for API documentation and consumption.

- **Responsive UI:** Implementing responsive design to ensure 100% accessibility across different screen sizes and resolutions.
